C. Away™

BENEFITS

SUPPORTS NORMAL LEVELS OF CANDIDA ALBICANS
SUPPORTS HEALTHY IMMUNE FUNCTION
PROMOTES HEALTHY BALANCE OF INTESTINAL FLORA

SUGGESTED USAGE

As a dietary supplement, take 2 Vcaps® twice daily, preferably with meals. Consider taking this product in combination with A-Biotic™ softgels.

CAUTIONS /INTERACTIONS

Not recommended for use during pregnancy or lactation or by children 2 years and under. Caution should be exercised by those taking hormonal drugs, such as insulin, or other medications. May cause mild gastrointestinal symptoms.

VEGETARIAN/VEGAN PRODUCT

Contains no sugar, salt, yeast, wheat, gluten, corn, soy, milk, egg, shellfish or preservatives.

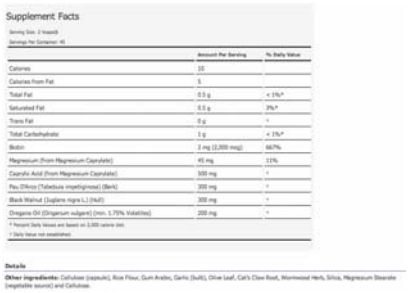
Discussion and Clinical Support

Protocol for Life Balance™ C. Away™ has been formulated to support the health of the gastrointestinal tract. A healthy microenvironment is known to be critical for the normal function of the digestive tract and healthy immunity. In addition, a healthy gut facilitates the detoxification process. The ingredients in C. Away™ encourage the growth of those microorganisms that contribute to a healthy balance of intestinal flora. C. Away™ can therefore help to promote proper immune function, and overall digestive health.

Protocol for Life Balance™ C. Away™ contains a specialized blend of nutrients and herbs that support healthy intestinal flora. Biotin, Magnesium, Caprylic Acid (a short chain fatty acid), Pau D'Arco (Tabebuia impetiginosa), BlackWalnut (Juglans nigra L.), and Oregano Oil (Origanum vulgare) are combined in this formula for effective control of undesirable organisms, as well as for optimal intestinal health. This unique formula, furthermore, has been carefully formulated to influence the growth of *Candida albicans*, a single-celled organism that naturally resides in the digestive system. An overgrowth in the gastrointestinal tract of this usually benign yeast (or fungus) can lead to yeast-related concerns.

Supports Normal Intestinal Levels of *Candida albicans*

In particular, this formula has been directed towards maintaining and supporting normal growth and gastrointestinal levels of *Candida albicans*. It contains a specialized blend of nutrients and herbs that support healthy intestinal flora. Biotin, Magnesium, Caprylic Acid (a short chain fatty acid derived from plant oils), Pau D'Arco (*Tabebuia impetiginosa*), Black Walnut (*Juglans nigra* L.), and Oregano Oil (*Origanum vulgare*) are combined in this formula for an effective approach to *Candida albicans*. The formula combines particularly well with A-Biotic™ special active garlic extract (1 - 10).



Supplement Facts

Supports Healthy Immune Function

The extract of Pau D'Arco and Oregano Oil are among the natural compounds proven to support healthy immune function (7, 11 - 13).

Promotes a Healthy Balance of Intestinal Flora

The synergism of the ingredients in C. Away™ helps to support a healthy balance of intestinal bacteria. The beneficial bacteria that normally populate the gut assist in the digestion of food, produce certain vitamins and promote detoxification processes.
