

CLINICAL STRENGTH PROSTATE-B™

Structural changes in prostatic tissue occur over time as a result of normal aging. These changes may be associated with difficulty in urinating, and other issues, which can be measured through the International Prostate Symptom Score.

In a double-blind, randomized, placebo-controlled study, men 45 years old or older receiving 320 mg/d saw palmetto (85-95% fatty acids) for 6 months had a significant decrease of the International Prostate Symptom Score ($p=0.038$) at the end of the study.*

Targeted for Prostate Health*

Clinical Strength Prostate-B™ combines the botanical ingredients saw palmetto extract, lycopene and beta-sitosterol at clinical doses, and includes prostate-supporting nutrients such as zinc, selenium, quercetin and vitamin D3.* This targeted nutritional support formula for the prostate promotes optimal urinary tract function and helps to maintain healthy prostate tissue.*

Give your patients the best
