

How can an innovative supplement help with aches & pains due to overexertion?*

Proto-Flex is a blend of three complementary ingredients designed to relieve occasional minor aches & pains due to overexertion by supporting healthy joint function and comfort.*

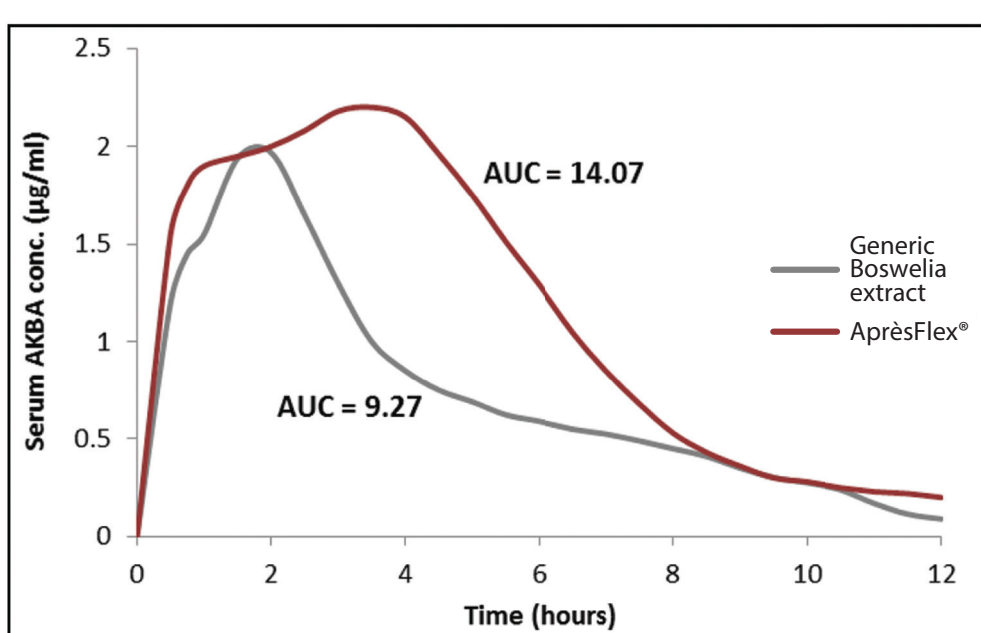

Bioactive Compounds

- 550 mg Glucosamine sulfate from 768 mg glucosamine potassium sulfate
- 100 mg Hyaluronic acid (1-1.5 MDa)
- 53 mg AprèsFlex®: unique *Boswellia serrata* extract obtained from a proprietary extraction method standardized to 10 mg AKBA (3-O-Acetyl-11-Keto-β-Boswellic Acid)

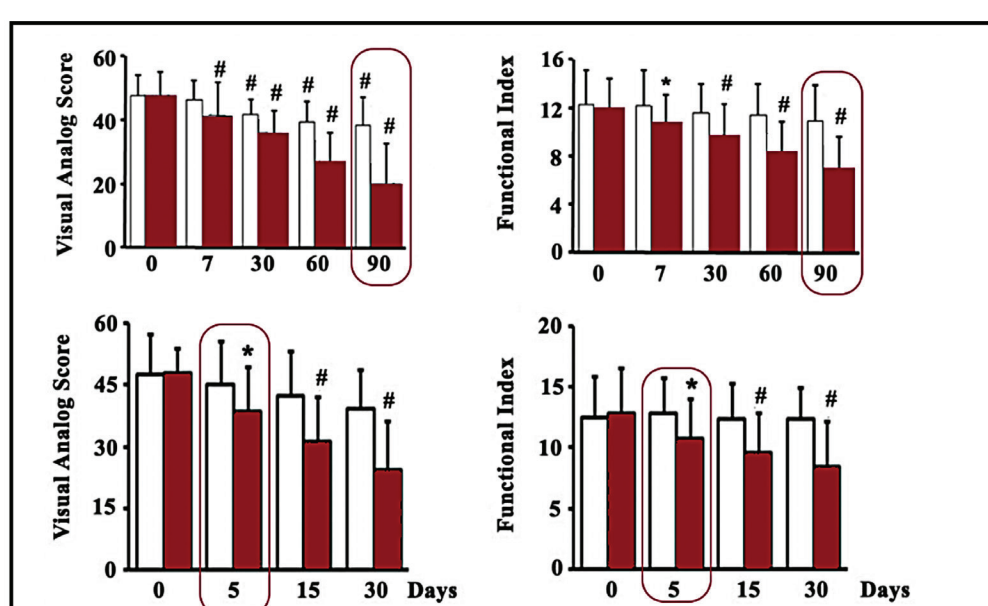

Bioavailable Compounds

After a single-dose administration of AprèsFlex®, AKBA is 51.78% more bioavailable than after ingestion of a generic *Boswellia* extract. (Study performed in animal model)^{1,2}

Joint Flexibility & Comfort*

Red bar: 100 mg/d AprèsFlex®; white bar: placebo. *p<0.05 #p<0.01. n=57

AprèsFlex® has been evaluated in several well-designed double-blind, randomized, placebo-controlled clinical trials.^{3,4}

50 mg AprèsFlex® twice daily:

- Results in significant reduction of pain due to overexertion vs. placebo*
- Promotes normal joint function in **as early as 5 days** after starting supplementation (Visual Analog Scale for pain and functional index questionnaire)*
- Effects remain statistically significant for pain and joint function for **up to 90 days***

At Protocol For Life Balance®, we believe in offering supplements that help people move freely without aches & pains due to overexertion.* Proto-Flex is a safe and effective joint nutrients blend designed to alleviate such inconvenience in a timely manner so your patients can get right back on track with their daily life.*
